19. ABSTRACT (Continue on reverse if necessary and identify by block number) A composite scenario was used to conduct a comprehensive task analysis of the UH-60 mission. This analysis used a top-down approach to identify the phases, functions, and tasks of the mission. Nine phases, 34 segments, 48 functions, and 138 tasks were identified. The crew-member performing each function was identified, and estimates of the sensory, cognitive, and psychomotor workload associated with the tasks were derived. Estimates of the task times also were derived. The mission/task analysis data were used to develop a computer model of workload for UH-60 crewmembers. The model used a bottom-up approach to build mission functions from tasks and mission segments from functions. Decision rules were written to specify the procedure for combining the tasks into functions and the functions into segments. The model permitted an analysis of total workload experienced by each crewmember in the performance of both sequential and concurrent tasks. <i>Keywords:</i>

APPENDIX H
SEGMENT SUMMARY WORKSHEETS

This appendix contains the Segment Summary Worksheets for each of the 70 segments. The summary worksheets identify and list all of the functions performed by each crewmember during each mission segment. The summary worksheets also identify the type of functions (i.e., discrete fixed, discrete random, or continuous) performed by the crewmember and the approximate temporal arrangement of the functions within the segments.

APPENDIX I
SEGMENT DECISION RULES WORKSHEETS

Once the Segment Summary Worksheets (see Appendix H) were completed for each segment, decision rules were written to describe the exact manner in which the functions must be combined to form the segment. The Segment Decision Rules Worksheets in this appendix contain the decision rules defining the sequence of the functions performed by each crewmember and the times on the mission segment timelines at which the functions begin and end.

DISCRETE (RANDOM)	CONTINUOUS	DISCRETE (RANDOM)	CONTINUOUS
6 times during the segment; randomly select (.50) Function 25 or Function 26. Functions 25 and 26 last 7 seconds each and cannot occur concurrently with Function 27. Program Function 27 to interrupt any ongoing discrete fixed function.	Start Segment 1 with Function 17. Function 17 lasts 516 seconds.	Start Segment 01 with Function 36. Function 36 lasts 85 seconds. After 2.5 seconds, interrupt Function 36 and start Function 35. Function 35 lasts 384 seconds. After Function 35 ends, finish Function 36.	Insert Function 25 each time the pilot performs Function 25 and Function 26 each time the pilot performs Function 26. Program these functions to interrupt any ongoing discrete fixed function.
Start Function 27 when Function 35 ends. Function 27 lasts 12 seconds.	Start Function 22 when Function 36 ends. Function 22 lasts 47 seconds.	Start Function 22 when Function 36 ends. Function 22 lasts 10 seconds.

15 times during the segment, randomly select (.50) Function 25 or Function 26. Functions 25 and 26 last 7 seconds each.	Start Segment 19 with Function 01. Function 01 lasts 900 seconds.	Insert Function 25 each time the pilot performs Function 25 and Function 26 each time the pilot performs Function 26.	Start Segment 19 with Function 31. Function 31 lasts 727 seconds. Interrupt Function 31 when Functions 03, 04, 18, 25, or 26 occur.
5 times during the segment, randomly select Function 03. Function 03 lasts 10.5 seconds and cannot occur concurrently with Functions 18, 25, or 26.	Start Function 17 concurrently with Function 01. Function 17 lasts 900 seconds.	1 time during the segment, randomly select Function 03. Function 03 lasts 10.5 seconds and cannot occur concurrently with Functions 18, 25, or 26.	Start Function 17 concurrently with Function 31. Function 17 lasts 900 seconds.
5 times during the segment, randomly select Function 18. Function 18 lasts 3.5 seconds and cannot occur concurrently with Functions 03, 25, or 26.		3 times during the segment, randomly select Function 18. Function 18 lasts 3.5 seconds and cannot occur concurrently with Functions 03, 25, or 26.	Start Function 04 600 seconds after Segment 19 starts. Function 04 lasts 41.5 seconds. Interrupt Function 31 when Function 04 occurs. Function 04 cannot occur concurrently with Functions 03, 18, 25, or 26.

Denotes segment that occurs in more than one mission phase.
